GG-GOURAUD'S ITALIAN MEDICATED SOAP IS nother instance of the triumph of Art over Nature, inasuch as it will certainly remove every vestige of tan, unburn, treckle, pimple, blotch, or morphew, from the ce of beauty! Indeed, so fully does it come up to the spectations of the inventor, that he is confident a consult use of it would actually remove the carbon from the tin of a Nubian. Buy only at 67 Walker street, or you'll e cheated with a swindling counterfeit.

Of- CONSTITUTIONAL DEBILITY CURED.—The onic Mixture, prepared by the College of Medicine and harmeey of the city of New York, is confidently recommended for all cases of debility produced by secret in algence or excess of any kind. PRIVATE MEDICAL AID.—The members of the New York College of Medicine and Pharmacy, in returning the public thanks for the fiberal support they have received in their effects to "suppress quackery," beg leave to state that their particular attention continues to be directed to all diseases of a private nature, and from the great improvements lately made in the principal hospitals of Europe in the treatment of those diseases, they can confidently offer to persons requiring medical aid advantages not to be met with in any institution in this country, either public or private. The treatment of the College is such as to insure success in every case, and is catally different from that herricous practice of ruining the constitution with increury, and in most cases leaving a disease much worse than the original. One of the members of the College, for many years connected with the principal hospitals of Furope, attends daily for a consultation from 9 A.M. to 8 P.M.

fty-CONNEL'S MAGICAL PAIN EXTRACTOR.—
This great healing salve is acknowledged by all who have used it to be the most wonderful article ever known. It repels all injuries by fire, extracts all pain, and prevents mortification in every case. It will cure any of the following complaints, or all pay is refused for it, viz:—

Burns, Old Sores, Erysipelas, Scalds, Bruises, Chaps, Salt Rheum, Scrofula, Wounds, Ecuptions, Sore Eyes, Files, Chilblains, Cold in wounds, Tender feet, &c.

ONCE FOR ALL.—The only genuine Pain Extractor is to be found where it always was at 21 Courtlandt street. Beware of all others, as there are imitations and counterfeits of a ruinous character.

ing-RICORD'S PARISIAN ALTERATIVE MIX-TURE.—For the cure of primary or secondary Syphilisand all affections produced by an injudicious use of mer cury. The great advantages possessed by this powerful alterative over all other preparations for the cure of Syphilis, is, that while curing the disease it improves the constitution, whilst mercury generally leave a much worse disease than the one it is administered for. The best recommendation we can give of it is, that it is now extensively prescribed by the medical faculty, who formerly considered mercury the only cure for those complaints. (Fig. "THE TESTIMONY IN FAVOR OF DR SHERMAN'S WORM LOZENGES" proves that they are the best medicine in the world for worms. Wherever they are used they are spoken of in the highest terms. Well may it be said that the children cry for them—they are pleasant to the taste, and so easily administered that parents do not experience the least difficulty in giving a medicine which is sure to do the work. And it is often the case that one dose will do more toward restoring the sufferer to health than all the medicine which has been taken for months. MONEY MARKET.

Sunday, June 30-6 P. M. The Stock Market during the past week has been gradually settling down into something like order. Prices have been steadily sinking, until [quotations now rule lower than at any time during the past month. The tremendous explosions that took place in stock opera-tions some little time since, completely upset the market and destroyed all confidence among the brokers in each other. A slight improvement took place yesterday at the first session of the Boards of Brokers, but prices fell off again in the afternoon, and the market resumed its former lepression. A slight galvanic shock passed through the

getting down to the point they surted from at the com-mencement of the late speculations. The Railroad slocks, operated so much in by speculators, are really im-poving in value, notwithstanding the fluctuting quota-tions through the street. The Long Island, Mohawk, Notwich and Worcester, and even the Harlem, must, before many months pass by, be good stocks. These works are steadily progressing towards completion. The re-ceipts of these in active operation are gradually increas jog, and the fannish condition of the companies perma-nently improving. The daily receipts of the Harlem are very large, averaging full 500 dollars per diem. This makes the annual receipts nearly two hundred thousand

This route to Boston must take the precedence of all others, on account of the distance, it being about forty miles nearer than any other Better time can be made over these roads between the two cities, than on any other, and as we are a go-ahead people, the shortest and quickest route will be the favo-rite one. This is a very wonderful increase in so short a period. The mcrease in the first six months of 1844, nearly amounts to as much as the total receipts for the same period in 1842 and 1843. The value of the importations, on which this large amount of duties accrued, cannot be so great, in proportion to the receipts, as in 1842. The average duty on imports for that year ruled very low, as the first eight months of the year were under the compromise act, and very large importations yielded comparatively a small revenue. We see in the annexed table this view illustrated.

our exports. The limited wants of foreign nations for our products—cotton excepted—creates but a very triffing draught on our immense supplies. The absence of large markets to take away our products, as fast as they accumulate, has no effect on the quantity produced, but has a very serious effect on prices, reducing them to the very lowest point, and forcing our stocks abroad on speculation, at ruinous prices. During years of great speculation heretofore, when our importations were very heavy prices for our agricultural products ruled very high, and the producers were enabled to come into the market with the means to purchase largely the manufactures we were importing. The consumers of our imports were comparatively lith, to what they are at this moment. The low prices paid for our agricultural products will compel the producers to live more within themselves, and the demand for imported merchandise must be very greatly restricted to what it would be, were our farmers receiving great prices for their crops. An attempt to import heavily for the future, in the face of the present prices for our own staples, will most assuredly be attended with our own staples, will most assuredly be attended with seriousilosses.
